

**AMENDMENTS TO THE SPECIFICATION**

Please amend the specification as follows:

Please replace paragraph [0011] and paragraph [0012] with the following replacement paragraphs.

[0011] Fig.1 is the result of FACS using FITC-labeled E4PHA, in the present invention, (a) RLE cell, (b) a hepatic cancer cell AH66, (c) a hepatocyte immediately after perfusion, (d) a hepatocyte non-parenchymal cell after culturing for 48 hours, and (e) a hepatic non-parenchymal cell after culturing for 48 hours.

[0012] Fig. 2 is the result of FACS using FITC-labeled LCA, in the present invention, (a) RLE cell, (b) a hepatocyte immediately after perfusion, (c) a hepatocyte non-parenchymal cell after culturing for 48 hours, and (d) a hepatic non-parenchymal cell after culturing for 48 hours.
